

NEW WILMINGTON MUNICIPAL AUTHORITY  
134 High Street  
New Wilmington, PA 16142

Notice to Customers:

Under mandate of the state Department of Environmental Protection, all new service connections made to the Authority's water system shall have a backflow prevention device and thermal expansion tank installed before installation of water service.

Similarly, when existing properties are sold, the seller and/or buyer must have a backflow prevention device installed before the initiation of water service. Also required is a non-removable hose bibb vacuum breaker at all hose connections. The Authority recommends a type for cold climates. A thermal expansion device is also required.

If you have questions, contact the Borough Office at 724-946-8167.

TYPE OF DEVICES THAT MUST BE INSTALLED: Residential dual check valve or commercial double check valve/RPZ valve, non-removable hose bibb and thermal expansion device.
